

FitTrack

Fitness Tracking Mobile Application

UX/UI Design Documentation & Case Study

Role: Lead UX/UI Designer

Design Tool: Figma

Task : 1

1. Project Overview

Project Name

FitTrack – Personal Fitness Companion

Project Type

Mobile Fitness Tracking Application

Purpose

FitTrack is a fitness and wellness application designed to help users monitor their daily physical activities, track workouts, manage fitness goals, and maintain a healthy lifestyle through personalized insights and progress monitoring.

Target Audience

- Fitness enthusiasts
- Students and young professionals
- Gym beginners
- Health-conscious individuals
- People aiming for weight loss or muscle gain

2. Problem Statement

Many people struggle to maintain consistency in their fitness journey because they lack:

- A centralized fitness tracking system

- Daily motivation and reminders
- Clear visualization of progress
- Personalized workout recommendations
- Goal tracking mechanisms

FitTrack addresses these challenges by providing a simple and engaging fitness management experience.

3. Objectives

The primary objectives of FitTrack are:

Health Monitoring

Track daily activities and fitness metrics.

Workout Management

Provide categorized workout programs.

Goal Achievement

Allow users to set and monitor personal fitness goals.

Motivation

Encourage consistency through challenges and progress tracking.

User-Friendly Experience

Deliver a clean, modern, and intuitive interface.

4. Design Process

Step 1: User Research

Common findings:

User Need	Observation
Easy Tracking	Users want quick access to daily statistics
Motivation	Users enjoy challenges and achievements
Progress Visualization Graphs help users stay motivated	

User Need	Observation
Goal Setting	Users prefer measurable goals

Step 2: User Persona

Persona: Priya

Age: 22

Occupation: Student

Goals

- Lose weight
- Improve fitness level
- Maintain workout consistency
- Forgets workouts
- Lacks motivation
- Doesn't track progress regularly

5. Information Architecture

6. Screen Analysis

Screen 1: Splash Screen

Purpose

Creates the first impression of the application.

Features

- App logo
- Fitness-related icons
- Application name
- Call-to-action button

Design Highlights

- Gradient background

- Minimalistic layout
- Modern typography

User Action

Click **Get Started**

Screen 2: Login Screen

Purpose

Authenticate users securely.

Components

Email Field

User enters registered email.

Password Field

Secure password input.

Sign In Button

Allows account access.

Social Login

- Google Login
- Apple Login

Sign Up Link

Creates a new account.

Benefits

- Fast authentication
- Multiple login options
- User-friendly interface

Welcome Back!

Screen 3: Home Dashboard

Purpose

Provide an overview of daily fitness performance.

Features

Daily Steps

- 10,547 steps
- 70% goal completion

Calories Burned

- 487 kcal

Water Intake

- 6/8 glasses completed

Weekly Progress Graph

Visual representation of activity levels.

Benefits

- Quick performance review

- Progress monitoring
- Daily motivation

Screen 4: Weekly Progress

Purpose

Analyze workout performance.

Graph Metrics

- Monday to Sunday activity tracking
- Peak performance identification
- Trend analysis

Advantages

- Data-driven fitness decisions
- Improved consistency

Screen 5: Workout Categories

Available Workouts

Cardio

- Duration: 30 min
- Calories: 250 kcal

Yoga

- Duration: 45 min
- Calories: 180 kcal

Strength Training

- Duration: 40 min
- Calories: 320 kcal

Cycling

- Duration: 35 min
- Calories: 280 kcal

Benefits

- Workout variety

- Easy selection
- Personalized fitness routines

Screen 6: Daily Challenge

Challenge Name

Morning Run

Objective

Complete a 5 km run.

Reward

Earn bonus points.

Benefits

- Increased motivation
- Daily engagement
- Achievement system

Screen 7: Progress Tracking

Weekly Goal

4/5 workouts completed.

Calories Burned

1,847 / 2,500 kcal

Active Minutes

127 / 150 minutes

Benefits

- Goal visibility
- Performance measurement
- Accountability

Screen 8: Fitness Goals

Goal 1: Lose Weight

Target Weight:

- 75 kg

Current Weight:

- 80.2 kg

Status:

- On Track

Goal 2: Build Muscle

Target:

- Strength Training 3 Times/Week

Status:

- In Progress

Goal 3: Run 5K

Current Best:

- 3.2 km

Status:

- Started

7. Visual Design System

8. Navigation Structure

Bottom Navigation Menu

Home

Dashboard overview

Workout

Workout categories and challenges

Goals

Goal management

Profile

User account settings

9. Key Features

Fitness Tracking

Track steps, calories, and activity.

Water Intake Monitoring

Daily hydration management.

Workout Library

Various fitness categories.

Goal Management

Set and achieve personal goals.

Progress Analytics

Charts and visual reports.

Daily Challenges

Increase engagement and motivation.

Social Login

Google and Apple integration.

10. Usability Principles Applied

Simplicity

Clean interface with minimal distractions.

Consistency

Uniform colors, typography, and components.

Visibility

Important statistics displayed prominently.

Feedback

Progress bars and completion indicators.

Accessibility

Readable text and intuitive navigation.

11. Future Enhancements

AI Fitness Coach

Personalized workout suggestions.

Smartwatch Integration

Sync with wearable devices.

Nutrition Tracking

Meal and calorie logging.

Community Features

Fitness groups and leaderboards.

Push Notifications

Workout reminders and achievements.

12. Conclusion

FitTrack is a modern fitness-tracking mobile application designed to help users maintain a healthy lifestyle through activity monitoring, workout planning, goal tracking, hydration management, and progress visualization. The intuitive UI, engaging challenges, and data-driven insights create an enjoyable user experience that motivates users to stay consistent and achieve their fitness goals.

TaskFlow AI

Task : 2

Category: AI-Powered Productivity Platform

Project Overview

TaskFlow AI is a modern productivity and workflow management platform that uses Artificial Intelligence to help teams organize tasks, automate repetitive work, improve collaboration, and track performance. The platform is designed to increase productivity through intelligent automation and data-driven insights.

Project Objective

The primary objective of TaskFlow AI is to simplify task management and improve team efficiency by providing AI-powered tools that automate workflows and streamline collaboration.

Problem Statement

Many organizations struggle with:

- Manual task management
- Poor team coordination
- Time-consuming repetitive processes
- Lack of productivity tracking
- Difficulty managing projects across multiple teams

These challenges often result in reduced efficiency and missed deadlines.

Proposed Solution

TaskFlow AI provides an intelligent workspace where teams can:

- Automate routine tasks
- Collaborate in real time
- Monitor project progress

- Access cloud-based resources
- Generate analytics and insights

The platform helps users work smarter while reducing manual effort.

Powerful Features for Modern Teams

Everything you need to streamline your workflow and boost productivity

AI Task Automation

Automatically prioritize, categorize, and assign tasks using advanced machine learning algorithms.

Team Collaboration

Real-time collaboration tools that keep your entire team synchronized and productive.

Smart Analytics

Gain actionable insights with intelligent reporting and performance tracking dashboards.

Cloud Synchronization

Access your work from anywhere with secure cloud storage and instant sync across devices.

Key Features

1. AI Task Automation

- Automatically prioritizes tasks
- Categorizes work items
- Assigns tasks using AI algorithms
- Reduces manual workload

2. Team Collaboration

- Real-time communication
- Shared workspaces
- Team synchronization
- Improved coordination

3. Smart Analytics

- Performance tracking
- Productivity reports
- Actionable insights
- Data visualization dashboards

4. Cloud Synchronization

- Secure cloud storage
- Access from multiple devices
- Automatic data synchronization
- Remote work support

Get Started in Three Simple Steps

Start boosting your productivity in minutes

1

Create Workspace

Set up your personalized workspace in seconds with our intuitive onboarding flow.

2

Organize Tasks

Add your tasks and let our AI automatically organize and prioritize them for you.

3

Track Progress

Monitor team performance with real-time analytics and intelligent insights.

How It Works

Step 1: Create Workspace

Users create a personalized workspace and configure their project settings.

Step 2: Organize Tasks

Tasks are added to the platform, and AI automatically prioritizes and organizes them.

Step 3: Track Progress

Users monitor project status, team performance, and productivity through real-time analytics.

The screenshot shows the TaskFlow AI website's pricing section. The header includes the TaskFlow AI logo, navigation links for Features, How It Works, Pricing, and a Start Free Trial button. The main heading is 'Simple, Transparent Pricing' with a subtext 'Choose the perfect plan for your team'. Three pricing plans are displayed: Starter (\$9/user/month), Pro (\$29/user/month, marked 'Most Popular'), and Enterprise (Custom pricing). Each plan lists its features with green checkmarks.

Plan	Price	Features
Starter	\$9 /user/month	✓ Up to 10 team members ✓ Basic AI task automation ✓ 5 GB cloud storage ✓ Email support ✓ Mobile app access
Pro	\$29 /user/month	✓ Up to 50 team members ✓ Advanced AI automation ✓ 100 GB cloud storage ✓ Priority support ✓ Advanced analytics ✓ Custom integrations ✓ API access
Enterprise	Custom pricing	✓ Unlimited team members ✓ Full AI capabilities ✓ Unlimited cloud storage ✓ Dedicated account manager ✓ Custom training ✓ SLA guarantee ✓ On-premise deployment

Pricing Plans

Starter Plan – \$9/User/Month

- Up to 10 team members
- Basic AI automation
- 5 GB cloud storage
- Email support

- Mobile app access

Pro Plan – \$29/User/Month

- Up to 50 team members
- Advanced AI automation
- 100 GB cloud storage
- Priority support
- Advanced analytics
- API access

Enterprise Plan – Custom Pricing

- Unlimited team members
- Full AI capabilities
- Unlimited cloud storage
- Dedicated account manager
- Custom training
- SLA support
- On-premise deployment

Benefits

- Increased productivity
- Reduced manual work
- Better project visibility
- Improved team collaboration
- Faster decision-making
- Scalable for businesses of all sizes

Expected Outcomes

By implementing TaskFlow AI, organizations can:

- Complete projects faster
- Improve team performance
- Increase operational efficiency
- Enhance collaboration
- Make data-driven decisions

Conclusion

TaskFlow AI is a comprehensive productivity solution that combines artificial intelligence, collaboration tools, analytics, and cloud technology into a single platform. It enables teams to work more efficiently, automate routine tasks, and achieve better business outcomes through smarter workflow management.

FashionHub

Premium Design System

Task : 3

Project Overview

FashionHub is a premium design system created specifically for fashion e-commerce platforms. It provides a complete collection of design foundations, reusable UI components, design tokens, and accessibility guidelines to help designers and developers build consistent, scalable, and visually appealing digital experiences.

The system focuses on luxury aesthetics, usability, and maintainability while ensuring a unified design language across all products.

Project Objective

The primary objective of FashionHub is to establish a centralized design framework that enables teams to create high-quality fashion e-commerce applications efficiently and consistently.

Key Goals

- Ensure visual consistency across platforms
- Improve development efficiency

- Enhance user experience
- Support accessibility standards
- Provide reusable design assets
- Simplify design-to-development handoff

System Overview

FashionHub Design System includes:

- 80+ Design Tokens
- 25+ Reusable Components
- WCAG Accessibility Compliance
- Multiple Export Formats
- Comprehensive Documentation
- Scalable Design Foundations

Core Modules

1. Foundations

The Foundations module defines the core visual language of the design system.

Color System

A carefully designed color palette ensures consistency and accessibility.

Primary Colors

Used for:

- Main actions
- Brand identity
- Important content

[← Back to Home](#)

Foundations

Design Foundations

The foundation layer defines the core design tokens that power the FashionHub design system. These tokens ensure consistency across all products and platforms.

Color System

A comprehensive color palette with semantic naming and accessibility-first design.

Primary (Black)

Core brand color for primary actions and emphasis

Neutral Colors

Used for:

- Backgrounds
- Borders
- Secondary content
- Layout structure

Accent Gold Colors

Used for:

- Premium experiences
- Promotional banners
- Luxury highlights

Success Colors

Used for:

- Confirmation messages

- Positive actions
- Status indicators

Typography System

FashionHub uses two primary typefaces:

Playfair Display

Used for:

- Hero sections
- Page titles
- Premium branding
- Luxury presentation

Inter

Used for:

- Body content
- Product descriptions
- Forms and navigation
- UI elements

Typography Scale

Headings use **Playfair Display** (serif) for elegance. Body text uses **Inter** (sans-serif) for readability.

Font Family: Playfair Display

Font Family: Inter

Typography Scale

The system includes:

- Display Large
- Display
- Heading 1
- Heading 2
- Heading 3
- Body Large
- Body Medium
- Body Small

This ensures consistent text hierarchy across all interfaces.

Border Radius

Consistent corner rounding for visual harmony.

Next Steps

Explore how these foundations come together in our component library.

Border Radius System

A standardized radius scale creates visual consistency.

Available values include:

- Radius None
- Radius Small
- Radius Base
- Radius Medium
- Radius Large
- Radius XL
- Radius 2XL
- Radius Full

These values are applied across buttons, cards, inputs, and product containers.

[← Back to Home](#)[Components](#)

Component Library

A complete set of production-ready components designed for fashion e-commerce. All components are accessible, responsive, and follow our design foundations.

Navigation

Responsive navigation with search, cart, wishlist, and mobile menu.

Buttons

Multiple button variants for different actions and emphasis levels.

2. Components Library

The Components Library contains reusable UI components designed for fashion e-commerce experiences.

Navigation Component

Features:

- Product category navigation
- Search functionality

- Wishlist support
- Shopping cart integration
- User account access
- Mobile responsiveness

Button Components

Different button styles support:

- Primary actions
- Secondary actions
- Outline buttons
- Promotional actions
- Call-to-action sections

Shopping Controls

Interactive shopping components include:

Quantity Selector

Allows users to increase or decrease product quantities.

Size Selector

Supports multiple clothing sizes such as:

- XS
- S
- M
- L
- XL

Color Selector

Allows customers to choose product colors visually.

Product Cards

FashionHub provides customizable product cards featuring:

- Product images
- Product categories
- Pricing information
- Discount labels
- Wishlist icons
- Sale indicators

These components are optimized for fashion retail experiences.

3. Design Tokens

Design tokens act as the single source of truth for design decisions.

Supported Formats

JSON Format

Used for:

- Design tools
- Automation workflows
- Cross-platform integration

SCSS Variables

Used for:

- Sass projects
- Front-end development
- Build pipelines

CSS Variables

Used for:

- Modern web applications
- Dynamic theming
- Responsive design systems

[← Back to Home](#)

Design Tokens

Design Tokens & Integration

Export FashionHub design tokens in multiple formats for seamless integration into your workflow. Use with React, Vue, vanilla JavaScript, or any framework.

Download Tokens

JSON Format

Structured token data for programmatic use. Perfect for design tools and automation.

4. Guidelines

The Guidelines section provides best practices for:

- Accessibility

- Typography usage
- Color application
- Layout consistency
- Responsive design
- User experience standards

These guidelines help teams maintain design quality throughout development.

Accessibility

FashionHub follows accessibility-first principles.

Accessibility Features

- WCAG compliant color contrast
- Readable typography hierarchy
- Consistent spacing system
- Keyboard accessibility support
- Responsive layouts
- Inclusive user experiences

Benefits of FashionHub

For Designers

- Faster design workflows
- Consistent visual language
- Reusable design assets
- Improved collaboration

For Developers

- Ready-to-use components
- Standardized design tokens
- Faster implementation
- Easier maintenance

For Businesses

- Strong brand consistency
- Reduced development cost
- Faster product delivery
- Better customer experience

Conclusion

FashionHub is a comprehensive premium design system built for modern fashion e-commerce platforms. By combining design foundations, reusable components, design tokens, and accessibility guidelines, it helps teams create elegant, scalable, and consistent digital experiences while improving efficiency across both design and development workflows.
